5. Statement

Attached hereto is a statement attesting to procedures referred to above based on:

- ☒ personal knowledge
☒ a showing believed to be satisfactory to the Commissioner

The Notice of Missing Parts requiring a response was misfiled due to staffing turnover and the recent merger and relocation of Mayor, Day, Caldwell & Keeton into Andrews & Kurth. The Notice of Abandonment was not received. Our patent service agent, Diane Matthews, communicated the case status to our office. A review of our file records was conducted and the original Notice of Missing Parts was located. Attached is a showing establishing non receipt of a PTO communication which includes a copy of our docket record where the abandonment communication would have been entered had it been received and docketed. The file jacket has been reviewed and searched and our docket

records indicate that the PTO Communication on the Notice of Abandonment was not received. This statement is being submitted in accordance with 37 USC § 151.

Applicant further encloses the signed Inventor's Declaration and Response to Missing Parts to complete the outstanding formality requirements in connection with the subject file.

6. Request

Applicant respectfully requests that this Petition for Revival be granted as submitted by the undersigned.

Respectfully submitted,

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

Expandable and contractible buoyancy modules (30) are assembled to the risers (24) of a deepwater exploration spar (16) or other offshore structure to provide an upwardly directed buoyancy force to offset at least a portion of the weight of the riser. The buoyancy modules (30) have a fabricated pressure tight expandable and contractible envelope (46) composed of rubber or rubber-like material which is mounted onto a tubular member (32) having a central passage for receiving the riser to be supported. The tubular member projects beyond the respective upper and lower ends of the envelope and defines upper and lower riser joint connectors (34, 36) and buoyancy module travel stops (38, 40) which secure the buoyancy module to the riser and provide for force transmission from the buoyancy module to selected locations along the length of the riser or to the upper end of the riser. The envelope (46) is provided with at least one access port (56) through which an inflation medium such as a gas or an uncured polymer can be added to control inflation of the envelope and through which liquid ballast is added or removed for ballast control.

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 36 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15 (b).

PLEASE NOTE the following information about the Filing Receipt:

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 600 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
